

CSWIM 2008 Final Program

Notes:

- (1) Each paper presentation will have 30 minutes, including paper presentation for 20~23 minutes, and remaining for open discussion.
- (2) All presentations should be prepared and given in English.
- (3) The best paper nominees are marked with the symbol ***.

Saturday, June 28, 2008

8:30am – 5:30pm Conference registration

6:00pm – 8:00pm Dinner/reception

Sunday, June 29, 2008

Before 8:30am Breakfast in your hotel

8:30am – 10:00am Opening remarks; Keynote speaker 1: Dr. J. Leon Zhao, University of Arizona, USA.
Title: Exploring Service Research: Concepts, Experiences, and Directions (Appendix)

10:00am – 10:15am Tea break

10:15am – 11:45am Parallel sessions

Session 1A IT Applications

Session chair: Jiexun Li, Drexel University, USA

Paper 1: Needs For Information Sharing In Healthcare: Case Study of Maternal Care Pathway in Pudong, Shanghai
Jiechen Jiang, Mikko Korpela & Irmeli Luukkonen, University of Kuopio, Finland

Paper 2: Semantic Query Expansion for Effective EMR Retrieval
Hemant Jain, Cheng Thao & Huimin Zhao, University of Wisconsin-Milwaukee, USA***

Paper 3: Design Principles for Computer Assisted Instruction (CAI)
Janna Crews, University of Nevada, Reno, USA & Jinwei Cao, University of Delaware, USA.

Session 1B Organizations, Governance, and Management

Session chair: Michael X. Zhang, Hong Kong University of Science and Technology, Hong Kong

- Paper 1: An empirical study: the impact of perceived organizational support on the relation between technostress and role stress
Qin Shu & Kanliang Wang, Xi'an JiaoTong University, China
- Paper 2: Technology Agility, Organizational Agilities, Business Processes and Firm Performance
Jing Quan, Salisbury University, USA; Huo Chunhui, Fudan University, USA
- Paper 3: The Diffusion "Gap" of Wi-Fi Technology among University Faculty Members and its Implications
Yong Lu, Penn State University Hazleton, USA; Jing Quan, Salisbury University, USA; Xubin Cao, Southwestern University of Finance & Economics, China
- 11:45am – 12:10pm Taking photographs of all participants
- 12:10pm – 1:30pm Lunch
- 1:30pm – 3:00pm Parallel sessions
- Session 2A: Business Modeling Technology**
Session chair: Bin Zhu, Boston University, USA
- Paper 1: Application of Organization Model based on LDAP Directory Server to Workflow Management System
Zhiyi Wang & Li Wang, Southwestern University of Finance Economics, China
- Paper 2: Process Component Identification from Business Policy Documents
Jiexun Li, Drexel University, USA; Harry J. Wang, University of Delaware, USA; Zhu Zhang, University of Arizona, USA; J. Leon Zhao, University of Arizona, USA***
- Paper 3: Transformation of Conceptual to Logical Business Process Models
Shaokun Fan, Manlu Liu & J. Leon Zhao, University of Arizona, USA
- Session 2B: Privacy Concerns and Protection in Online Environments**
Session chair: Stephen Liao, City University of Hong Kong
- Paper 1: Global Privacy: What do the Global 2000 Companies Say about Online Privacy?
Xiaoni Zhang & Toru Sakaguchi, Northern Kentucky University, USA; Mary Conway Dato-on, Rollins College, USA
- Paper 2: Influence of Information Sensitivity, Compensation on Privacy Concern and Behavior Intention
Shu Yang, Yuan Wang, Qingshun Liu & Kangliang Wang, Xi'an JiaoTong University, China

Paper 3:	Fighting Identity Theft: A Theory of Planned Behavior Model Fujun Lai, University of Southern Mississippi, USA; Dahui Li, University of Minnesota Duluth, USA; Kendrick Kennedy, University of Southern Mississippi ***
3:00pm - 3:15pm	Tea break
3:15pm – 5:15pm	Parallel sessions
Session 3A	Online Consumer Behavior
Session chair:	Hsing Cheng, University of Florida, USA (3:15-4:45pm)
Paper 1:	Influence of context on the concept drift an empirical study on the social economic environment influencing the relation between population attributes and Chinese credit card holder's loyalty Jiahui Mo, Peng Zou & Yijun Li, School of Management, Harbin Institute of Technology, China
Paper 2:	A New Taxonomy for Products/Services Marketed on Internet Melody Kiang, California State University, Long Beach, USA; YuanYuan Hao, Harbin Institute of Technology, China; Qiang Ye, Harbin Institute of Technology, China; Yijung Li, Harbin Institute of Technology, China; & Robert Chi, California State University, Long Beach, USA
Paper 3:	An Empirical Research on the Determinants of Conversion Rate of Online Auction Geng Peng, Guoqing Huo, Jie Chen & Ying Liu, Graduate University of Chinese Academy of Sciences, China
Session 3B	E-Business Technologies
Session chair:	Robert Chi, California State University, Long Beach, USA
Paper 1:	Data Transparency in Collaborative Commerce Duanning Zhou, Eastern Washington University, USA; Ta-Tao Chuang, Gonzaga University, USA; Kazuo Nakatani, Florida Gulf Coast University, USA
Paper 2:	Research on Transferable Electronic Cash System Yongjun Chen & Yichun Liu, Guangdong University of Business Studies, China
Paper 3:	Exploring the Combinational Use of Media: A Task Closure Perspective Wei Zhang, University of Massachusetts Boston, USA & Jianxun Chu, University of Science and Technology of China, China
6:30pm – 8:30pm	Banquet
8:30pm – 9:30pm	Open meeting on BI Education Coordinator: Yong Li, Chongqing University

Monday, June 30, 2008

8:30am -9:20am Keynote speaker 2: Chunxiao Liang, Alibaba Inc., China

9:30am – 11:00am Parallel sessions

Session 4A Effective Approaches to Online Advertisements

Session chair: Han Zhang, Georgina Institute of Technology, USA

Paper 1: A Heuristic Method For Finding Effective Advertising Key Words Using Click-Through Data
Yuan Xue, Xun Lin & Qing Li. Southwestern University of Finance and Economics, China

Paper 2: Advertisements Ranking for Targeted Banner Advertising – A Numeric Study
Kai Li, Nankai University, China; Zhangxi Lin, Texas Tech University, USA & Yang Yu, Beijing University of Aeronautics & Astronautics, China ***

Paper 3: What Makes Web Advertisements Effective? - Insight for Researchers and Practitioners
Ping Zhang & Youngseek Kim, Syracuse University, USA
Online Consumer Behavior

Session 4B Virtual Communities

Session chair: Li Wang, Southwestern University of Finance and Economics, China

Paper 1: Research on the Collaborative Learning System Based on WEB
Jiuqiang Chen & Chunpeng Lu, Southwestern University of Finance & Economics, China

Paper 2: Monitoring Conflicts in Virtual Teams: A Social Network Approach
Bin Zhu & Mark Gaynor, Boston University, USA

Paper 3: Volunteers' Psychological Contract in Open Source Software Development
Bo Xu, Fudan University, China; Weiling Ke, Clarkson University, USA

11:00am – 11:15am Tea break

11:15am – 12:15am Session 5A Panel: Business Intelligence

Moderator: Huimin Zhao, University of Wisconsin at Milwaukee, USA

12:20pm – 1:30pm Lunch

1:30pm – 3:30pm Research Methodology Tutorial

“Survey research methodology and SEM (Structural Equation Modeling)”
Dahui Li, University of Minnesota Duluth, USA

6:30pm - Dinner

Appendix: Introduction to keynote speakers

Keynote Speaker 1: Dr. J. Leon Zhao, University of Arizona, USA

Title: Exploring Service Research: Concepts, Experiences, and Directions

J. Leon Zhao, Eller Professor and Interim Head

Dept. of Management Information System

Director, Lab on Enterprise Process

Innovation and Computing (EPIC Lab)

Dept. of Computer Science (Joint Faculty)

University of Arizona, Tucson, AZ 85721

URL: <http://www.u.arizona.edu/~jlzhao>

Email: jlzhao@u.arizona.edu

Abstract

The world is becoming a complex service system as marked with many recent advances in information technologies and business practices such as service-oriented architectures, software as a service, wholesale outsourcing of IT services, and offshoring of large data centers. During the past couple of years, researchers in industry and academia have started exploring new research directions concerning service science, service computing, service management, and service engineering. As a personal effort in this context, I organized two panels on service computing and management in AMCIS'07 and ICIS'07, respectively, leading to two articles recently published in the Communications of AIS, which can be downloaded at <http://www.u.arizona.edu/~jlzhao/vita.html#JOURNAL>.

Although there have been a number of recent publications exploring service research, this area is not yet well defined and has many open issues. As such, there is currently a great opportunity for new perspectives and new thoughts from various disciplines such as computer science, information technology, marketing, organization science, operations management, economics, and so on. In this talk, I will share my knowledge and personal views on service research. I will first go over some background material and basic concepts in service science, management, and engineering, then give an overview of several projects of mine related to service computing and management, and finally open a discussion on research opportunities in service research.

Biography

J. Leon Zhao is Eller Professor and Interim Head of the Department of MIS. He also holds a joint appointment in the Department of Computer Science at the University of Arizona. He taught previously at HKUST and College of William and Mary, respectively. He holds a Ph.D. and M.S. from Haas School of Business, UC Berkeley, M.S. from UC Davis, and B.S. from Beijing Institute of Agricultural Mechanization. He has published more than 120 research articles in major journal and conference outlets. He received an IBM Faculty Award in 2005 for his work in business process management and services computing. Leon has been associate editor of Information Systems Research, IEEE Transactions on Services Computing, and Decision

Support Systems among others. He has co-edited nine special issues in various IS journals and chaired numerous conferences including the Workshop on E-Business (2003), the 15th Workshop on Information Technology and Systems (2005), the IEEE Conference on Services Computing (2006), and the First China Summer Workshop on Information Management (2007), the Arizona Exposium on Frontiers in Information Technology and Applications (2008), and the IEEE Symposium on Advanced Management of Information for Globalized Enterprises (2008).

Keynote Speaker 2: Liang, Chunxiao, Alibaba.com Corp, China
Title: Alibaba.com and The Development of China's E-commerce

Liang, Chunxiao
Alibaba.com Corp
Mobil: +86 13801295029
Tel: +86 10-65986918
Fax: +86 10-65986660
Email: chunxiao.liang@alibaba-inc.com
Website: www.aliresearch.com

Abstract

This presentation is to introduce the business profile, evolution and current status of Alibaba.com, a successful e-service company. The presentation will be focused on the B2B e-business, business model, and the development strategies of Alibaba.com using the relevant facts. Specifically, Specialization, Integration, Individuation, Precision, and Ecologization of the company will be addressed

Biography

Mr. Chunxiao Liang is Senior Researcher and Vice President of Alibaba.com Corp, Vice Director of E-commerce Committee, China Information Economics Society, and advisory board member for e-commerce of National Development and Reform Commission, Ministry of Commerce, and Ministry of Science and Technology. Mr. Liang's long-term research interests are e-commerce, informatization and cyber-economy. Mr. Liang took part in many e-commerce, informatization and cyber-economy research projects, including the Development Plan of E-Commerce in the 11th National Five-Year Plan, Ministry of Commerce's Report of Chinese E-commerce, Chinese Academy of Engineering's Research on Modern Service Industry Informatization Strategy, Ministry of Science and Technology's Research on Chinese E-commerce Development Strategy and Research on Evaluation System of E-commerce Engineering, Research on Chinese Online-merchant Development, etc. Mr. Liang is also the author of the books: "E-commerce: from concept to practice", "Introduction to E-commerce", "E-commerce Application", "Talking about E-commerce" and "Search Revolution". Mr. Liang proposes some influential concepts and ideas, including e-commerce ecology, IT transition, portal evolution, search evolution, online-merchant evolution, e-commerce with commerce as the core, etc.
